

# WHAT YOU RECOMMEND REALLY MATTERS

If you fill a prescription for an opioid,  
make sure your patients are prepared.

**MAKE SURE THEY KNOW ABOUT  
NALOXONE.**

**#HAVE IT  
ON HAND**

# HELP US REDUCE THE OPIOID OVERDOSE EPIDEMIC.

Filling opioid prescriptions is part of the job. When you do, help your patients stay safe. **#HaveItOnHand** is a statewide effort working with care providers across Maine to educate patients: if they have opioids in the home, they should have Naloxone (Narcan) there too.

**It's always better to be prepared.**
